NODEM 2014

Engaging Spaces – Interpretation, Design and Digital Strategies

December 1-3, 2014 Warsaw, Poland

Mobile Solutions and the Museum Experience

Annina Koskiola

Masters thesis for Stockholms University,

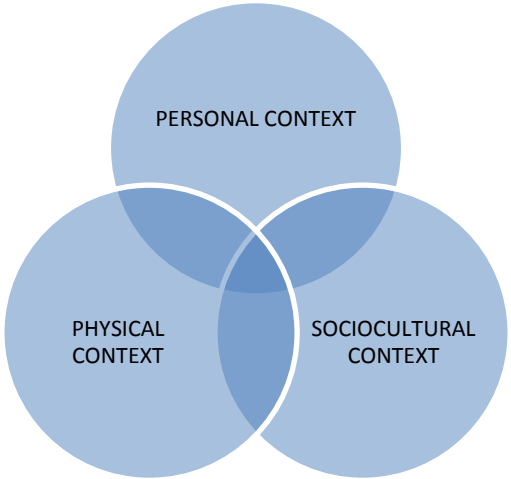

International Masters programme in Curating Art with Management and Law

- **Mobile solution** = mobile apps + mobile websites
- **Research questions:**

1) How are museums using mobile solutions at the moment and how do these affect the museum experience?

2) How would visitors wish to use mobile solutions to enhance their museum experience?

- **The contextual model** by Falk and Dierking

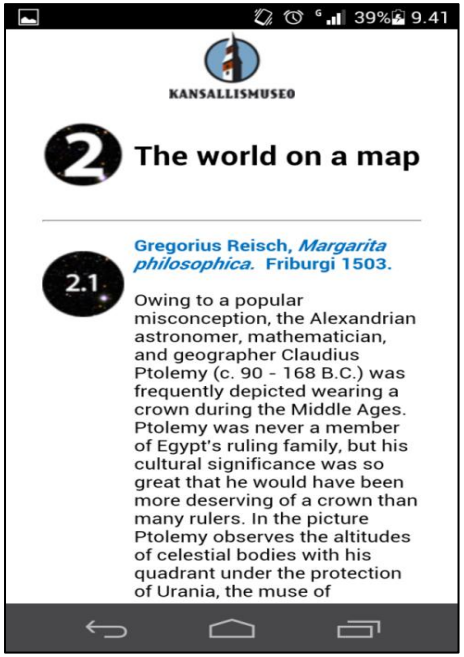

The Contextual Model, after Falk and Dierking, *The Museum Experience Revisited*, p. 26.

A typical example:

”The Emerging World” mobile website at the National Museum of Finland

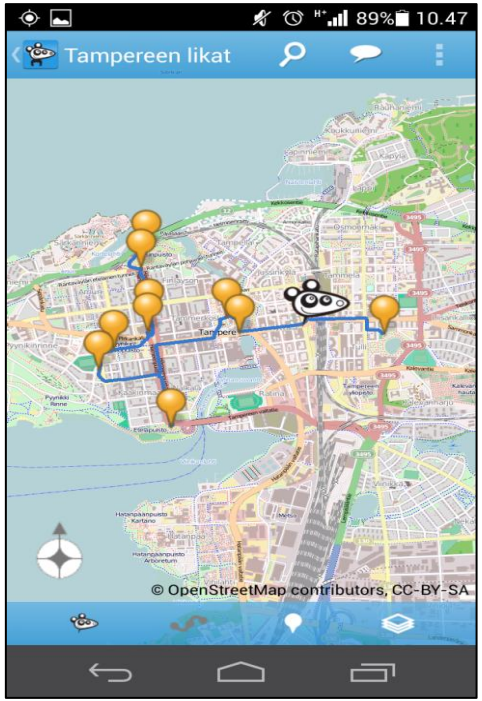

http://skm.nba.fi/welcome

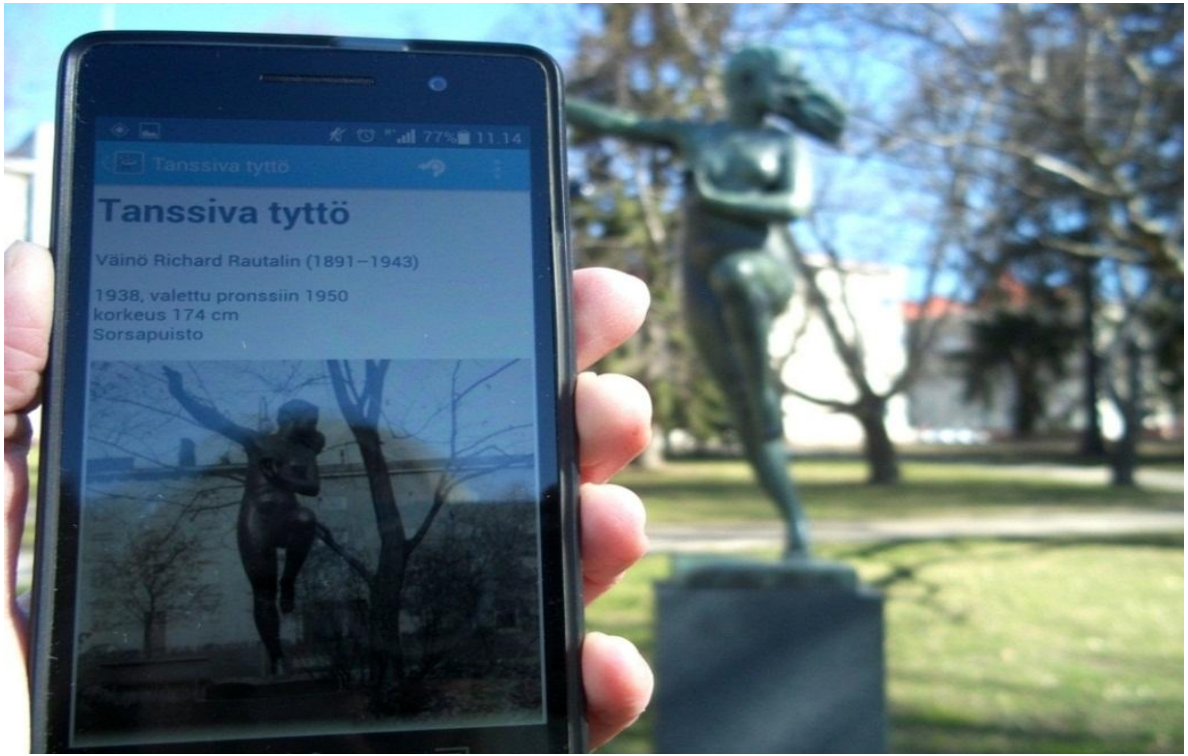

Physical aspect:

”Tampere Gals” by Tampere Art Museum

http://www.seinatonmuseo.fi/tampere （only in Finnish）

77% 11.14
Tanssiva tyttö
Tanssiva tyttö
Väinö Richard Rautalin (1891–1943)
1938, valettu pronssiin 1950
korkeus 174 cm
Sorsapuisto

Personal aspect:

Luostarinmäki Augmented Reality Game by Luostarinmäki Handicrafts Museum

Pictures from University of Turku Technology Research Centre Press kit: http://trc.utu.fi/ar/project/luostarinmaki-adventure/

Pictures from University of Turku Technology Research Centre Press kit: http://trc.utu.fi/ar/project/luostarinmaki-adventure/

Social aspect:

”Mad about Helsinki” by Helsinki City Museum

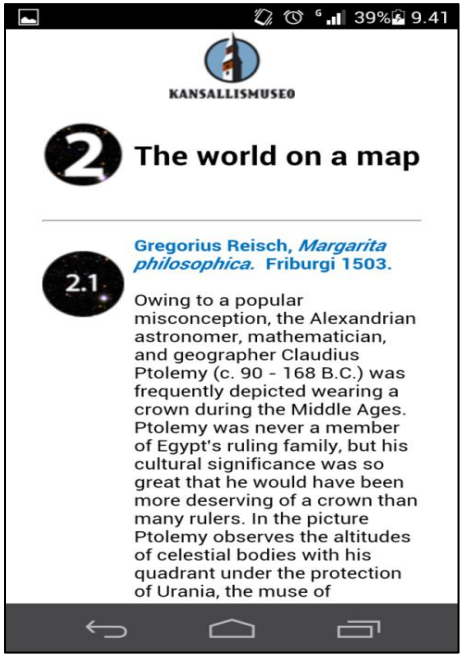

“When I was a little boy in the 60s, me and my friend sold lilies-of-the-valley here. Coffee at the market square was served from porcelain cups. The coffee shop owner circled round the stands selling them, and came back afterwards to collect the cups. A coffee and a doughnut was 50p, and a coffee 20p.”

A typical example:

”The Emerging World” mobile website at the National Museum of Finland

Personal
- marked interest for getting more information about specific topics of personal interest
- there needs to be a motivation for using a device
- Visual vs. auditory preference
Physical
- needs to have a function
- audio and video also popular
- great interest for a navigation aid
Social
- notable interest for participation by simple steps, such as voting, especially amongst youth
- some interest amongst young audiences for communicating with other visitors
- notable interest for communication with museum
