

The Effect of Artworks' Degree of Interactivity on Attention Holding in Exhibitions

Ayça Turgay
Halime Demirkan

1 INTRODUCTION

In exhibitions,

exhibit objects meet each other

as well as their audience.

a snapshot from an exhibit
in the British Museum

1 INTRODUCTION

* Copresence of exhibit objects causes a competition between them (Bitgood, Patterson, & Benefield, 1988; Bitgood, 2002).

1 INTRODUCTION

* Copresence of exhibit objects causes a competition between them (Bitgood, Patterson, & Benefield, 1988; Bitgood, 2002).

* The amount of attention paid to each exhibit object in an exhibition space decreases as the total number of exhibit objects increases (Melton, 1988).

1 INTRODUCTION

* Copresence of exhibit objects causes a competition between them (Bitgood, Patterson, & Benefield, 1988; Bitgood, 2002).

* The amount of attention paid to each exhibit object in an exhibition space decreases as the total number of exhibit objects increases (Melton, 1988).

* "The greater the number of stimuli surrounding an element, the less likely it will be noticed, especially if it lacks other salient factors" (Bitgood, 2002, p.468).

1 INTRODUCTION

THIS STUDY AIMS TO REVEAL;

the effects of a non-static artwork's presence
among a set of static artworks,
on visitor attention and behavior.

2 DESIGN & PROCEDURE | method

2 DESIGN & PROCEDURE | method

non-participant observation (video-recording)

* viewing times

2 DESIGN & PROCEDURE | method

non-participant observation (video-recording)

* viewing times

self-administered questionnaire

* levels of interest
* demographic information

2 DESIGN & PROCEDURE | artworks

4 DISCUSSION & CONCLUSION

- significance of exhibit objects' layout
  (Bitgood, 2006; Imamoğlu & Yılmazsoy, 2009)
- attributes resulting in hierarchical relationships between objects (Bitgood, et al., 1988; Melton, 1972; Peart, 1984; Bitgood, 1992)
- influences on visitor attention and behavior (Bitgood, 1992)

4 DISCUSSION & CONCLUSION

- ☑ significance of exhibit objects' layout (Bitgood, 2006; Imamoğlu & Yılmazsoy, 2009)
- ☐ attributes resulting in hierarchical relationships between objects (Bitgood, et al., 1988; Melton, 1972; Peart, 1984; Bitgood, 1992)
- ☐ influences on visitor attention and behavior (Bitgood, 1992)

4 DISCUSSION & CONCLUSION

- ☑ significance of exhibit objects' layout (Bitgood, 2006; Imamoğlu & Yılmazsoy, 2009)
- ☑ attributes resulting in hierarchical relationships between objects (Bitgood, et al., 1988; Melton, 1972; Peart, 1984; Bitgood, 1992)
- ☐ influences on visitor attention and behavior (Bitgood, 1992)

4 DISCUSSION & CONCLUSION

- ☑ significance of exhibit objects' layout (Bitgood, 2006; Imamoğlu & Yılmazsoy, 2009)
- ☑ attributes resulting in hierarchical relationships between objects (Bitgood, et al., 1988; Melton, 1972; Peart, 1984; Bitgood, 1992)
- ☑ influences on visitor attention and behavior (Bitgood, 1992)

4 DISCUSSION & CONCLUSION

- ☑ significance of exhibit objects' layout
  (Bitgood, 2006; Imamoğlu & Yılmazsoy, 2009)
- ☑ attributes resulting in hierarchical relationships between objects (Bitgood, et al., 1988; Melton, 1972; Peart, 1984; Bitgood, 1992)
- ☑ influences on visitor attention and behavior (Bitgood, 1992)

4 DISCUSSION & CONCLUSION

- ☑ significance of exhibit objects' layout (Bitgood, 2006; Imamoğlu & Yılmazsoy, 2009)
- ☑ attributes resulting in hierarchical relationships between objects (Bitgood, et al., 1988; Melton, 1972; Peart, 1984; Bitgood, 1992)
- ☑ influences on visitor attention and behavior (Bitgood, 1992)

- ☑ how a non-static artwork can alter visitors' interaction with itself AND the static artworks in the exhibition?

4 DISCUSSION & CONCLUSION

* durations of interaction between visitors and artworks could be depending on the distribution of interactivity degrees among artworks in the exhibition

4 DISCUSSION & CONCLUSION

* durations of interaction between visitors and artworks could be depending on the distribution of interactivity degrees among artworks in the exhibition

* when the non-static artwork was placed in an earlier position than static artworks, it did not influence visitors' behavior towards static artworks

4 DISCUSSION & CONCLUSION

* durations of interaction between visitors and artworks could be depending on the distribution of interactivity degrees among artworks in the exhibition

* when the non-static artwork was placed in an earlier position than static artworks, it did not influence visitors' behavior towards static artworks

4 DISCUSSION & CONCLUSION

* durations of interaction between visitors and artworks could be depending on the distribution of interactivity degrees among artworks in the exhibition

* when the non-static artwork was placed in an earlier position than static artworks, it did not influence visitors' behavior towards static artworks

locating artworks that perform a higher degree of interactivity before others might prevent them from eclipsing those performing a lower degree of interactivity
