Exploring Tate Britain and the Surroundings through Art

Participants' Experience

I was thinking that it's kind of a shame that you need a workshop like this to trigger something to make you actually go out there and explore and look at things afresh; and it's kind of ideally the way you should be living your life anyway, if you could just peel off the layers of responsibility and commitment, and the shortage of time.

- - - - - - - - - - - - - - - -

I was surprised at how little we used the app, but how much it generated… I thought it would be much more engrossing for the children to be ... gazing at the screen all the time, but actually it took you outside of that digital world and to the world around you and we talked about things we hadn't talked about before.

So, in fact it was a piece of work that influenced me and completely changed the way I was experiencing the city.

Engaging Spaces | Interactive Outdoor Trail

Exploring the City of Ancona (Italy) through the Eyes of JMW Turner

Participants' Experience

It was interesting, because it happens to me very often - when I visit a museum - that I see a landscape and I wonder how is that place today. So, it was very interesting to see the artworks, and at the same time, to be in the place that they represent.

- - - - - - - - - - - - - - - -

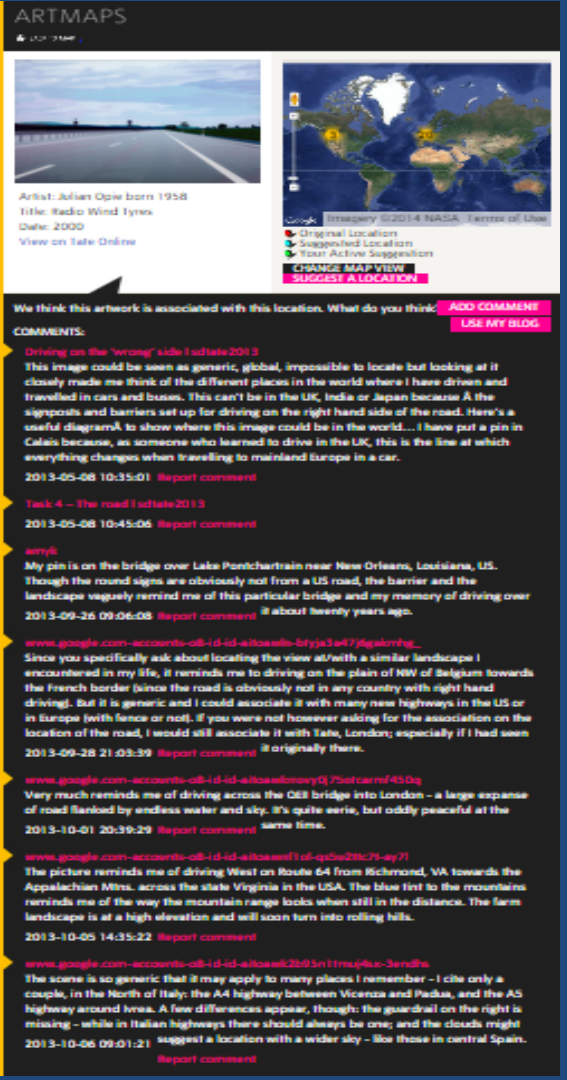

It was fascinating to see the city through the eyes of an artist. Surely, it made me want to go back to the Tate, and to see Turner's sketches.

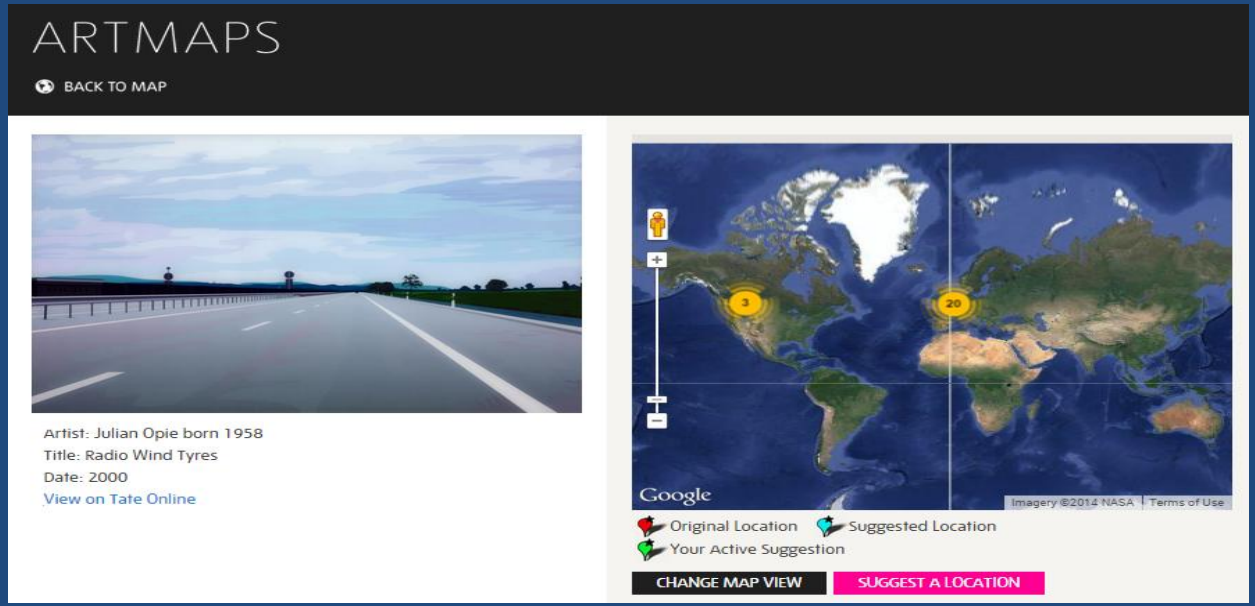

- - - - - - - - - - - - - - - -

I enjoyed the experience more than audio-guides, because you can choose the sequence of the content, the direction that you want to take. I also enjoyed that I can decide what content I want to access and what I don't want to access.

Exploring Web-based Engagement with Art

Participants' Experience

DRIVING IN FRANCE ON A FAMILY CAMPING HOLIDAY...

Based on the visual clues I am reminded of driving in France. With that lodged in my mind, the more emotional side of the image narrows it down to long treks to the south along the motorways through middle of France, heading off with a fully loaded car on a family camping holiday.

A TRIP WITH FRIENDS TO THE ROCKIES IN CANADA...

The first place I thought of when looking at this road was Canada, when friends took me for a drive up through the Rockies. The highways and landscape are so different to home I was quite taken with them. It was the first road that came to mind when I saw the work.

THE QUEEN ELIZABETH II BRIDGE IN LONDON...

Very much reminds me of driving across the QEII bridge into London - a large expanse of road flanked by endless water and sky. It's quite eerie, but oddly peaceful at the same time.

Participants' Feedback

FEEDBACK FROM THE ONLINE SURVEY	%
facilitated new ways of engaging with locations and artworks	85.71
increased their understanding of a particular artist's work	71.43
facilitated new ways of thinking about artworks	85.71
facilitated new ways of exploring the Tate collection	95.24
enabled them to interpret artworks in new ways	71.43
enabled them to learn something new	95.24

Museum as a Platform

The Art Maps project is shaping how we think about the role of the museum as a platform for audience engagement and the issues raised by the project are proving to be fundamental for our work in the years ahead.

The Art Maps project and its research questions has coincided with a wider transition at Tate from audience interaction being a marginal activity to one that is informing much of our thinking about the future of the organisation.

The museum of the future is not just a place where objects related to cultural heritage are cared for and displayed. It is a platform where new ideas and meanings are generated, exchanged and preserved, and digital technologies will likely be key to enabling this.

John Stack, Head of Digital Transformation at Tate
http://www.tate.org.uk/context-comment/blogs/art-maps-and-museum-platform

Reflections

- Scaffolded vs. Unscaffolded Experiences;
- Use of Third-Party Platforms;
- Preservation of Audience Generated Content;
- Fundamental Role of the Audience as Informant in Design;
- On-line platforms as Tools for Situated and On-line Engagement;
- From Metadata to Novel Ways of Engaging Audiences.

(Open) Q&A

How can we **reimagine our digital collections** to design novel experiences for the visitors?

How can we **explore new forms of visitors' learning?**

How can we **take the museum out of its walls** (e.g. online, outdoor)?

How can we **exploit new media and technologies to facilitate public engagement with cultural resources**?

Interactive Experience vs. Experiential Interaction

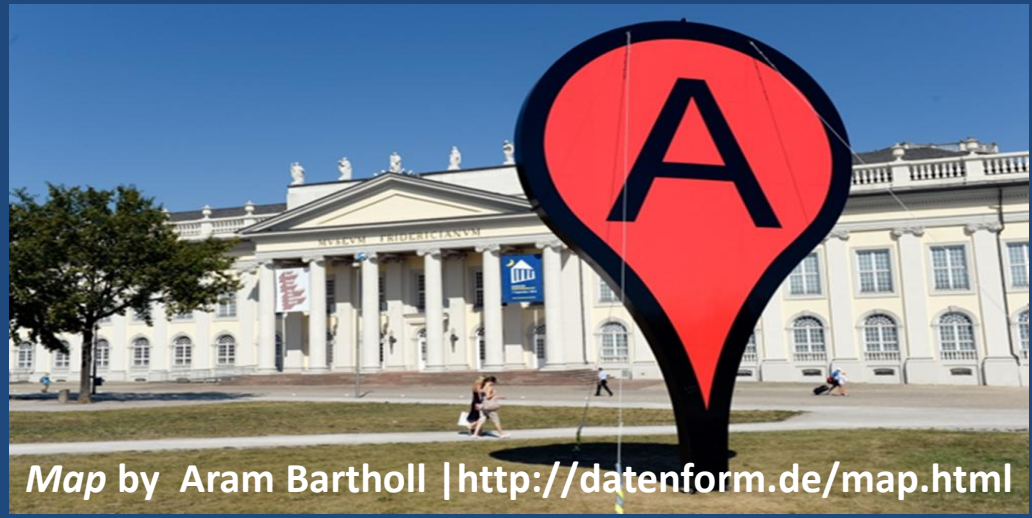

What do we mean for "Experience"?

Every experience both takes up something from those which have gone before and modifies in someway the quality of those which come after [Principle of Continuity].

An experience is always what it is because of a transaction taking place between an individual and what, at the time, constitutes his environment whether the latter consists of persons with whom he is talking […]; the book he is reading; or the materials of an experiment he is performing [Principle of Interaction].

J. Dewey (1938), Experience and Education.
