285 - lanterndecke ceiling - roof beams. Still see in Tajikistan. Tent hanging. *Square vihara-type* built around 538-9, making it Mogao's earliest dated cave. The square recess at the apex of the ceiling shows the Lanterndecke design but also has decoration of triangles and tassels, emulating a tented hanging. The motif continues at the top of the walls with a design of looped-up curtains. This became a common motif on ceilings to the Guiyijun period.

Wall Paintings at Mogao Grottoes

A project of the Getty Conservation Institute

Wall painting stratigraphy. Composite image illustrating the stratigraphy of the paintings in Cave 85. The paintings were executed as fine line drawings in red and black ink on a ground preparation covering two base layers of earthen plaster, and then filled in with mineral pigments and washes of organic colorants. Credit: Lori Wong.

IDP: 1993—

IDP started with the vision of reuniting virtually all the manuscripts from the Dunhuang Library cave for a scholarly audience.

Initiated by curators and conservators at the major collections of Library Cave material worldwide.

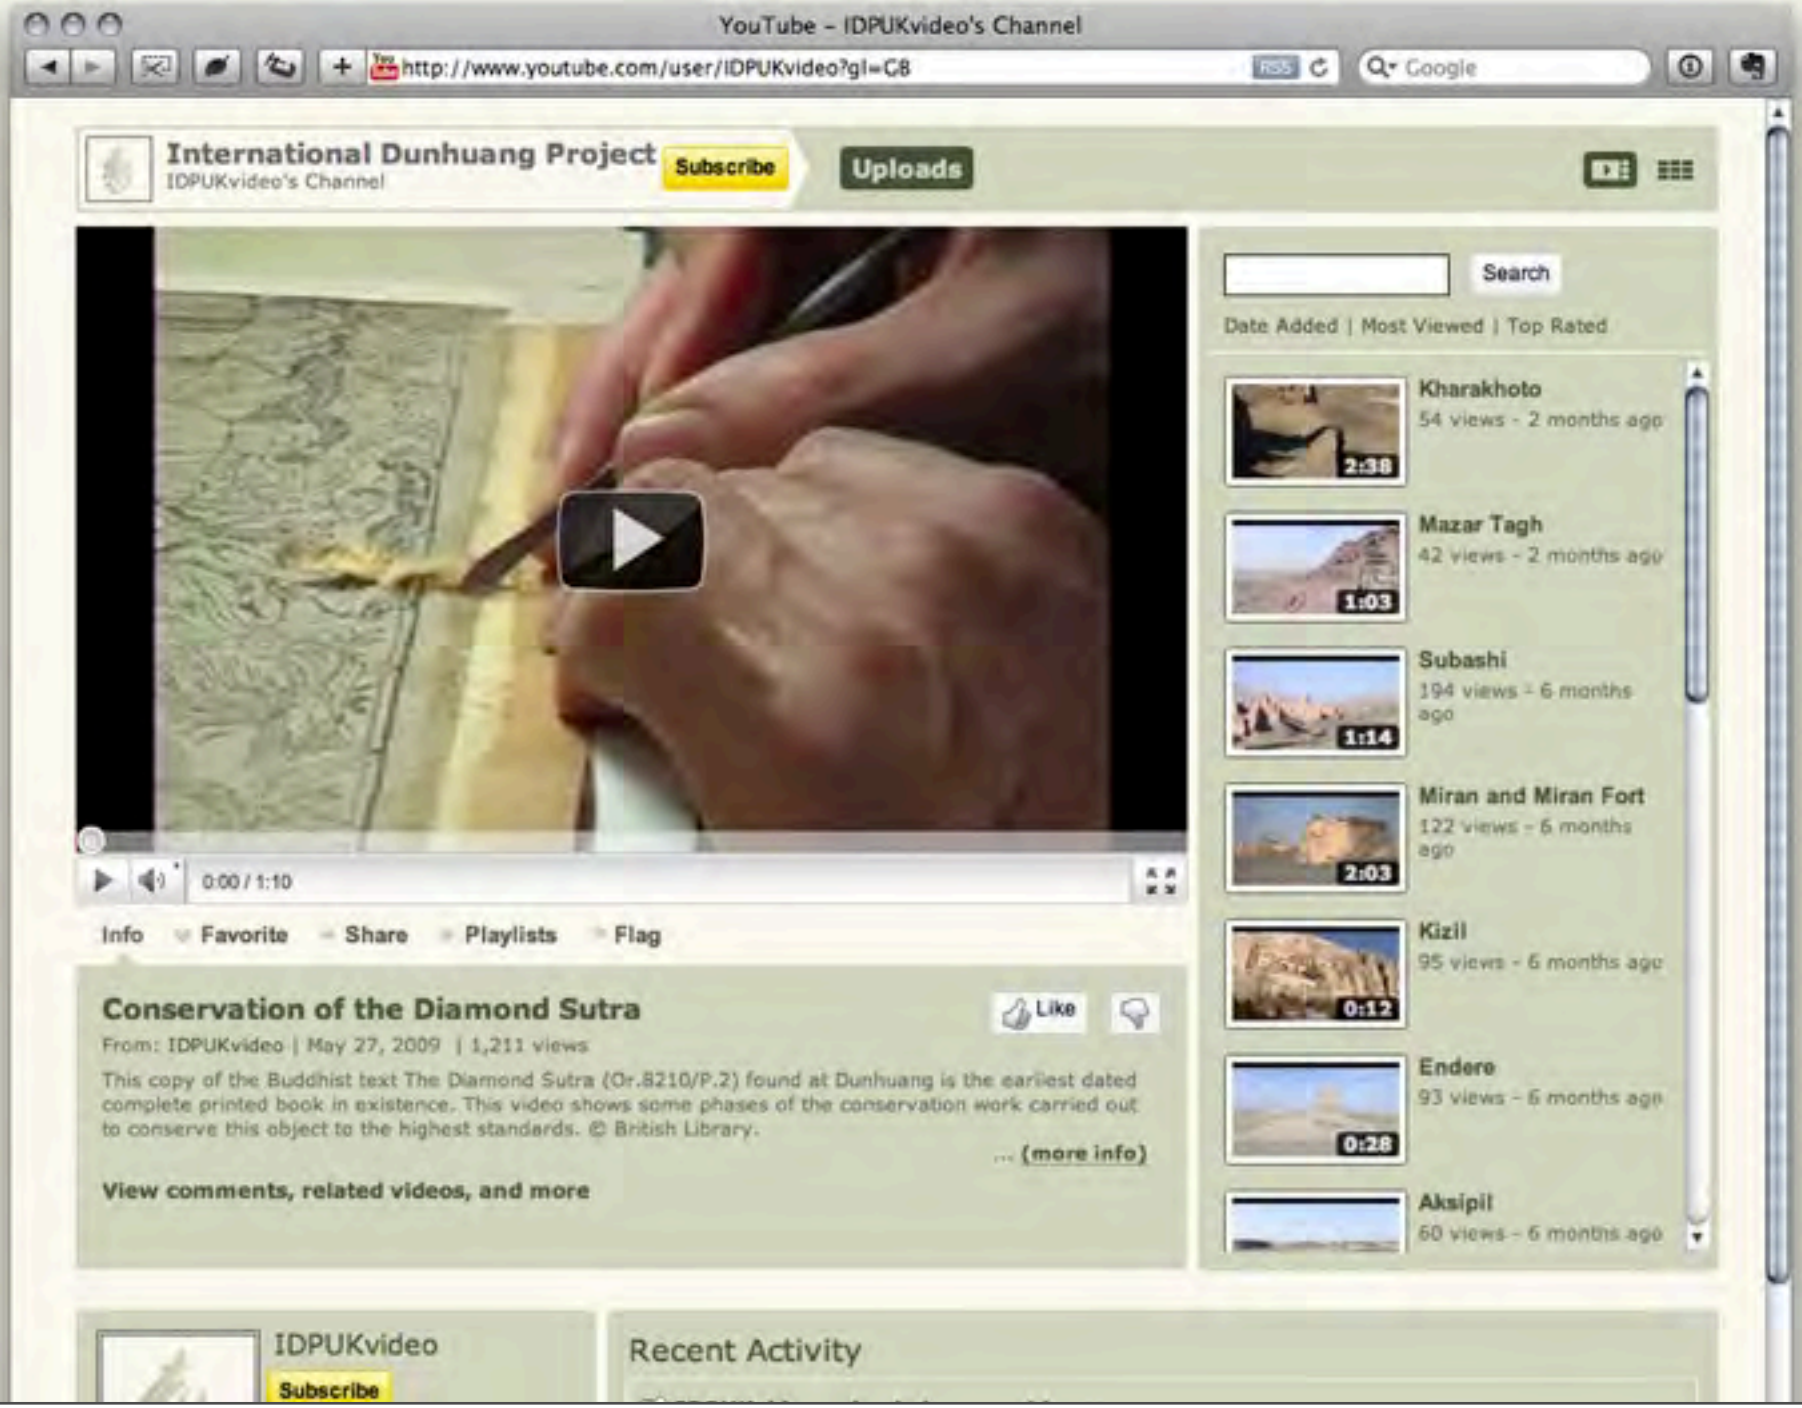

Directorate at the British Library.

IDP: from cave to computer

... ensuring access and preservation

IDP INTERACTIVE WEB DATABASE

Newly updated - now searchable by published catalogue

View details of over 26,000 pre-eleventh century manuscripts and documents from the ancient towns of the Chinese Silk Roads. Full search facilities - by language, form, library number and subject - and high-quality colour images of over 2,000 manuscripts.

The International Dunhuang Project (IDP) was established in 1993 following a meeting of conservators from all over the world to promote the study and preservation of manuscripts and printed documents from Dunhuang and other Central Asian sites through international co-operation. The secretariat is at The British Library in the Oriental and India Office Collections.

Contents

The following pages give information on the background of the Dunhuang collection and further details of IDP. This information is also available in a bi-lingual (Chinese-English) leaflet which can be obtained from IDP (see address at bottom of page). IDP publishes a newsletter, which is available online.

INTERNATIONAL DUNHUANG PROJECT
国际敦煌项目

The International Dunhuang Project: The Silk Road Online

IDP is a ground-breaking international collaboration to make information and images of all manuscripts, paintings, textiles and artefacts from Dunhuang and archaeological sites of the Eastern Silk Road freely available on the Internet and to encourage their use through educational and research programmes.

IDP partner institutions which both provide data for and act as hosts to the multilingual website and database are:

The British Library, London IDP Directorate (English Version)
The National Library of China, Beijing (Chinese version)
The Institute for Oriental Manuscripts, St Petersburg (Russian version)
Ryukoku University, Kyoto (Japanese version)
The Berlin-Brandenburg Academy of Science and Humanities (German version)
The Dunhuang Academy, Dunhuang (Chinese version)
Bibliothèque nationale de France (French version)

Major IDP partners providing data include:

The Library of the Hungarian Academy of Sciences, Budapest
The British Museum, London
The Victoria & Albert Museum, London
The Museum for Asian Art, Berlin
Guimet Museum, Paris

IDP's many other collaborating institutions provide data and work on joint projects

IDP: User survey 2012–3

Q5: Which International Dunhuang Project site(s) have you accessed?

A5: English (idp.bl.uk)

Q6: How often do you access the site?

A6: Several times a month

Q7: Please rate the IDP website on the following aspects.

	Excellent	Good	Neutral	Fair	Poor	Don't Know
Ease of use of the site		x				
Attractiveness of design		x				
Download speed		x				
Extent of material available	x					
Type of material available	x					
Search facilities		x				
Search results		x				
Appropriateness of results						
Having up to date information		x				

Q8: Have you ever accessed the actual collections at any of the IDP partner sites? e.g. Dunhuang manuscripts, Stein paintings.

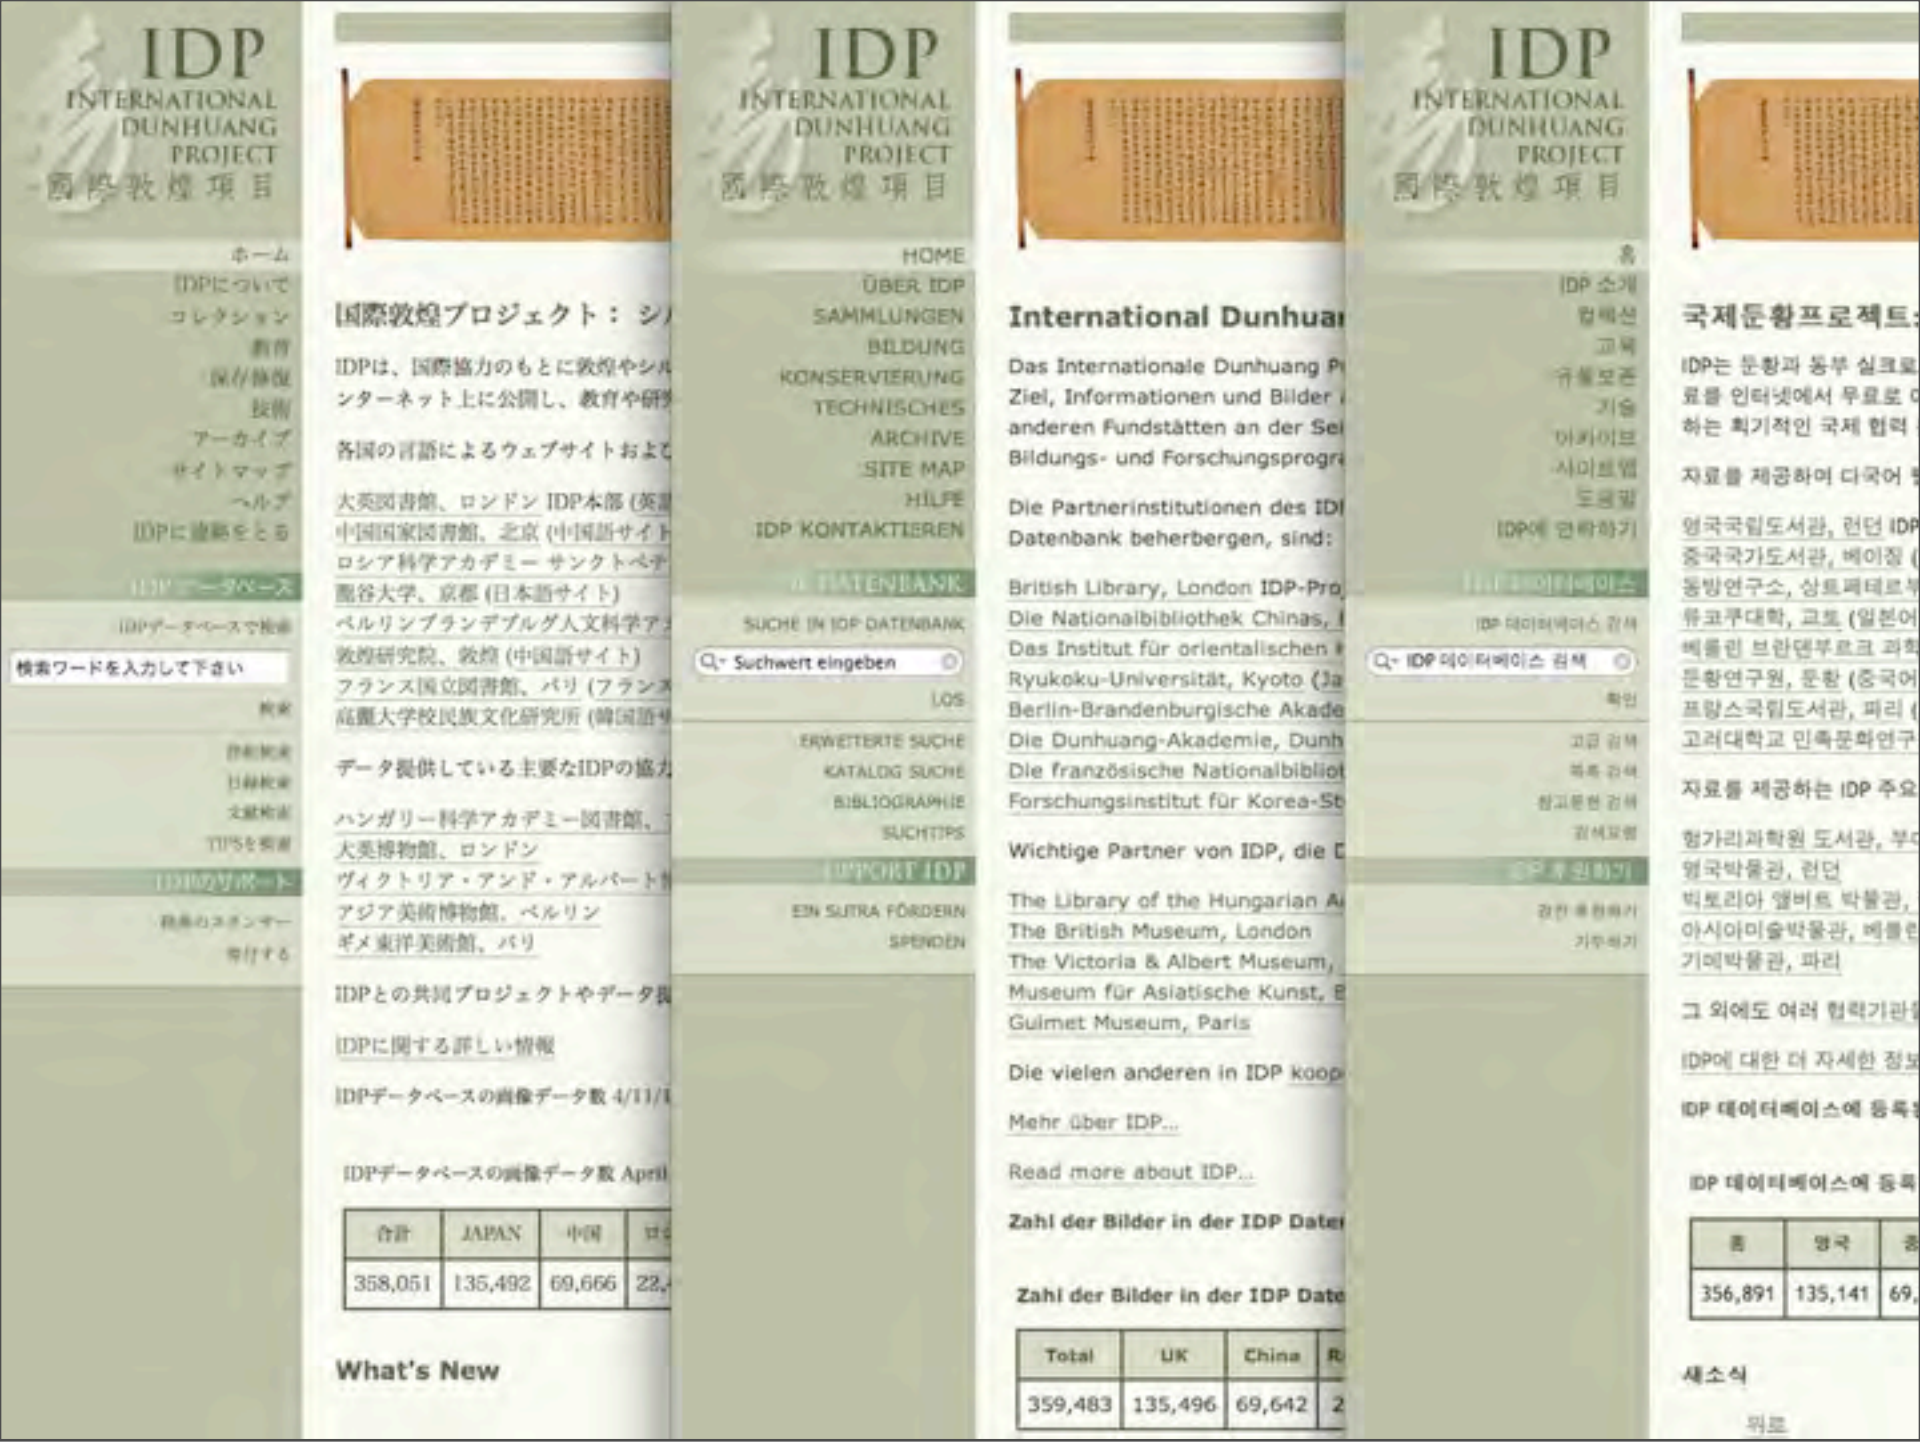

A8: British Library, London / National Library of China, Beijing

Q9: If you have any other comments, please add them here

A9: n/a

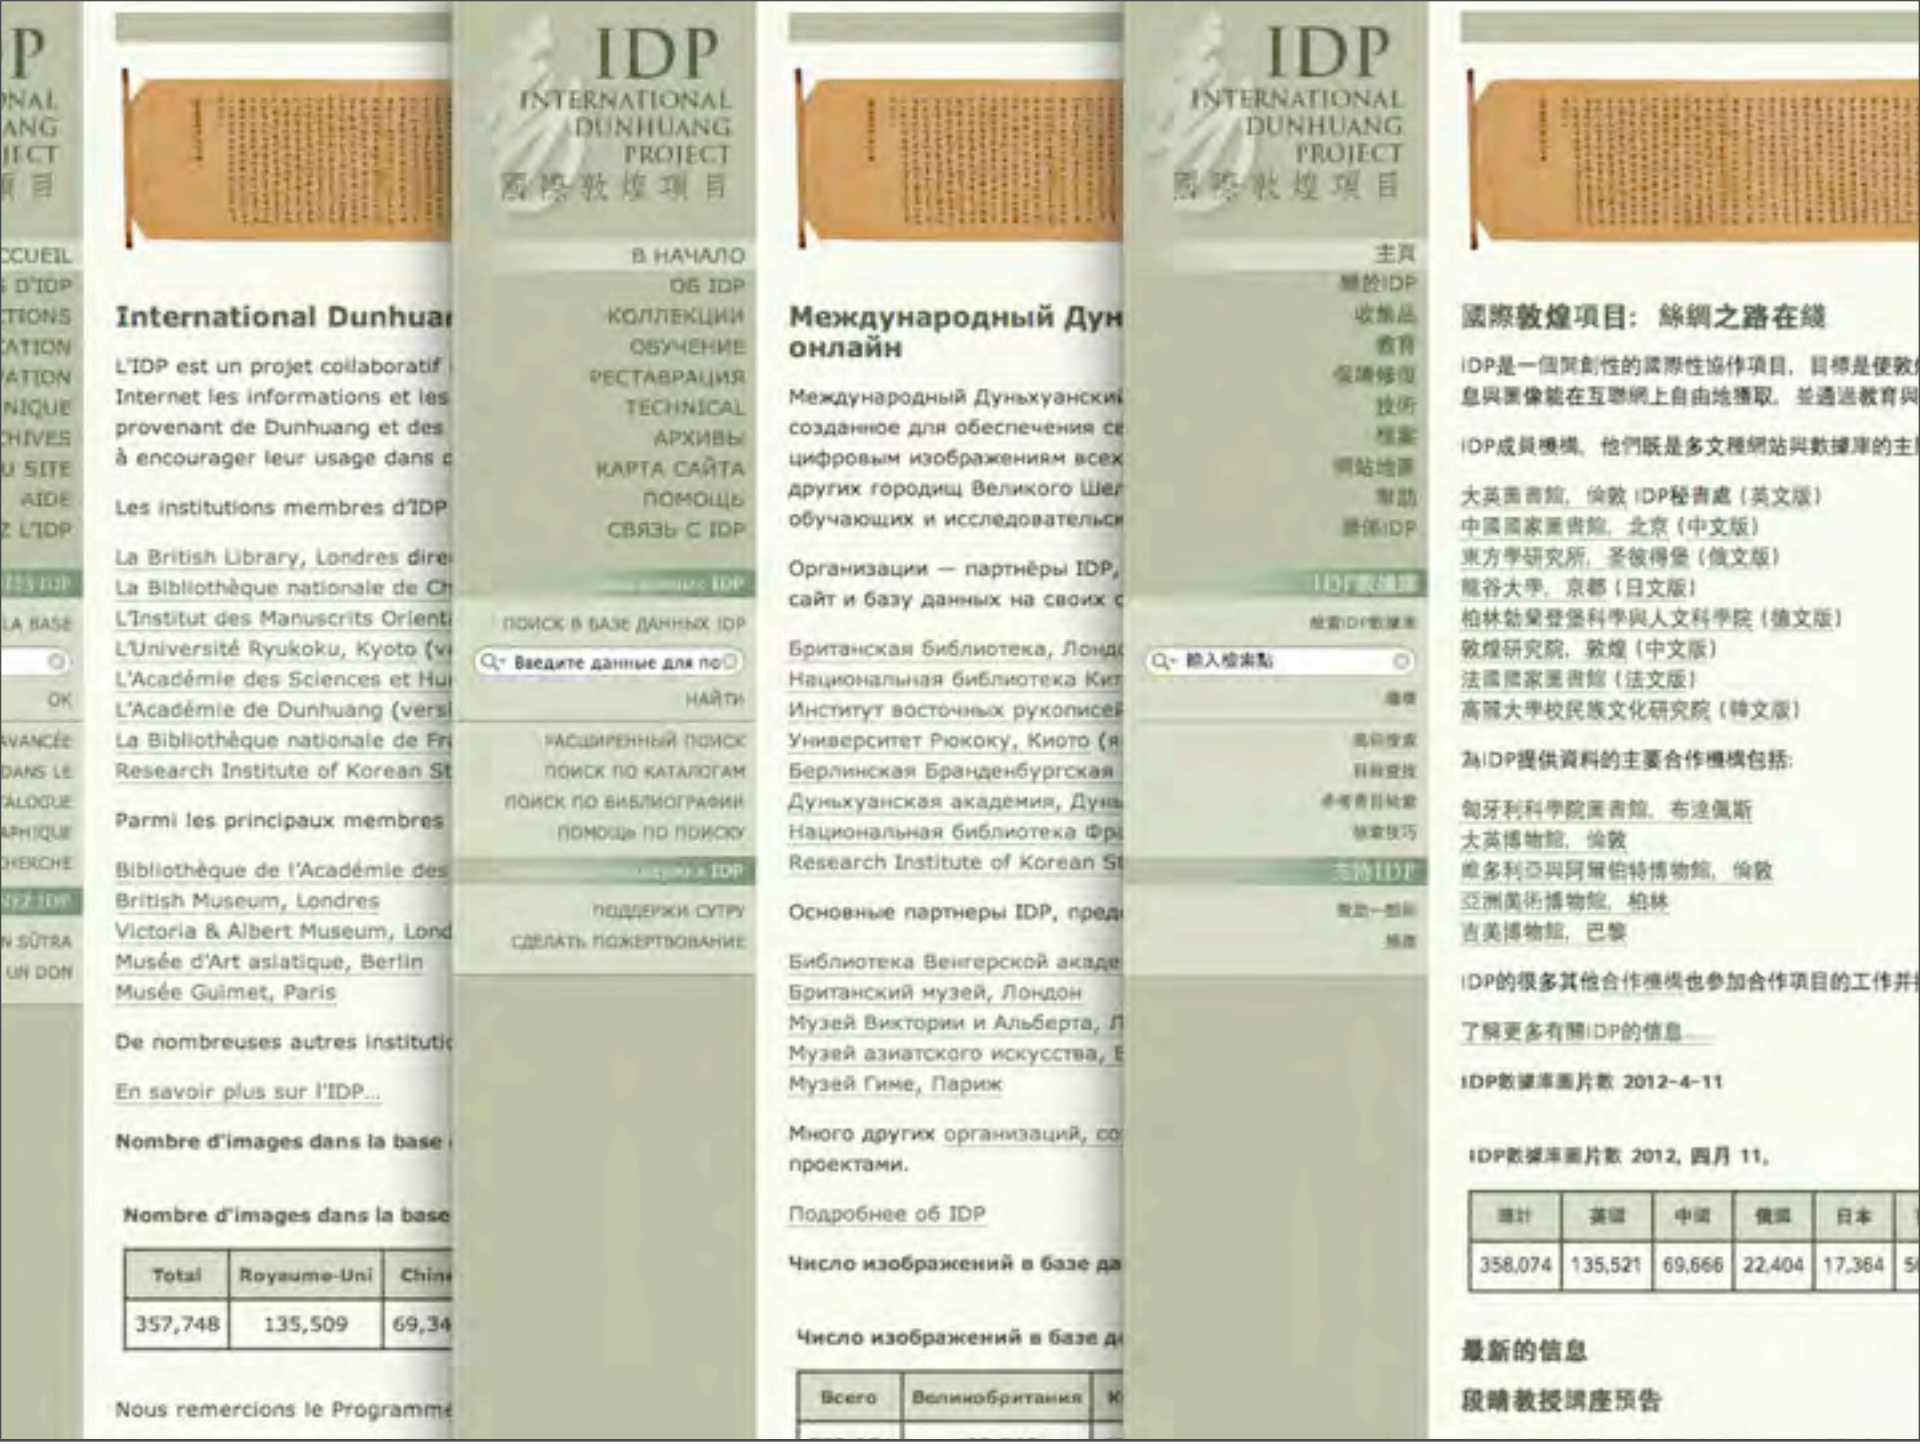

95 of the users has previously used the IDP website, dividing more or less equally between research (59) and general interest (57), with teaching (24) and picture research (26) also both featuring.

English website (97) –not surprising

Merit, Opulence and the Buddhist Network of Wealth

A Collaborative Research and Technical Project Sponsored by

Northwestern University
and the
Dunhuang Research Academy

Project Director:
Professor Sarah E. Fraser

Harlan Wallach at work creating digital images in Dunhuang.

Digital Dunhuang

Media Architect Harlan Wallach partners with Dunhuang Academy to create virtual caves

Digitization is a mechanism that allows for study, research and enjoyment of cultural heritage in ways you can't otherwise

If there's one word to describe Dunhuang's future, it's digitization, says Harlan Wallach, Architect for Media Technologies from the Department of Research and Academic Technologies at Northwestern University. "Versatile and efficient, digitization provides many new opportunities for study, research and enjoyment," he says.

The 3-D Modeling Process

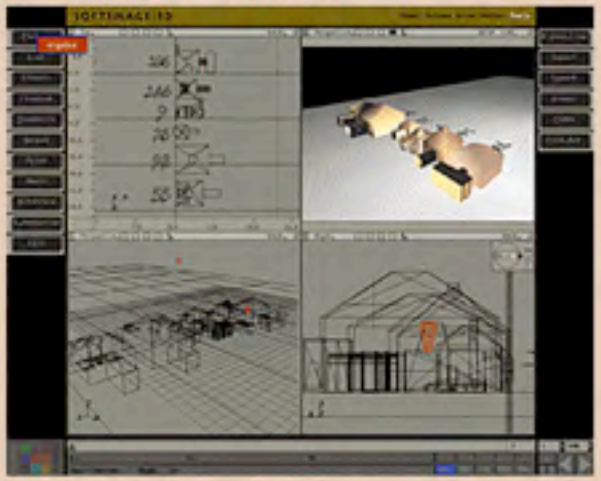

SOURCE PHOTOS

STITCHED TEXTURE

hotographs show the east wall of cave 196. Because these were not shot perpendicular to their surface, they first require parallax correction.
led and stitched into a single texture. The stitched texture is then ready for mapping onto its surface of the 3-D model. This example also
rates the need for consistent lighting during photography in order to avoid having to perform excessive color correction during texture asse

WIREFRAME MODELS

3-D RENDERINGS

metry data for these 3-D models was developed from architectural drawings of the cave, then iteratively refined in a modeler with line and
tion obtained from the photographs. We are currently experimenting with photogrammetry software to aid in the development of accurate g
tion for the models. Once the model is created, the image textures are mapped to their appropriate surfaces.

IDP: expansion

- Its scope has since expanded, both in terms of the content to be digitised and the audience.

- Textiles, archaeological artefacts, paintings and murals from all sites on the Eastern Silk Road, are being digitised by IDP, along with the archaeologists' notes, plans, maps, diaries and other expedition archives.
